

## | WOODEN TREE

+ 5 years | Difficulty: ★★ | 3 hours

### You need:

- Wood slices to decorate
- Mini glue gun
- Posca paint markers metallic colours
- Acrylic paint (bronze)
- Mini Christmas stencils
- Varnish-glu
- Hessian twine
- Waxed cotton thread
- Pins
- A card or thick sheet
- And also:

### Steps :

- Varnish all wooden washers (two coats).
- Once dry, make designs on the 10 wooden discs using Posca and Christmas mini stencils.
- On a 11th disc, create a woven star with the pins in a "STRING ART" way (step to be performed by an adult). The child can then thread the waxed cotton thread around the pins."
- Once the drawings are dry, use a coat of varnish to finalize the pieces.
- Position the fir-shaped pieces, spacing the blanks and those with drawings. To give relief to the tree, keep a few discs to put them on top. Then, depending on the positioning, paint bronze rings to form a garland.
- With the mini pistol, glue the first wooden rings from the bottom to the top onto a piece of cardboard.
- Place two jute twine on the star washer to form a loop and glue it.
- Optional step: cut the outline of the tree with a craft knife or decorate the cardboard around the tree.

An original Christmas tree!
