- Then cut a length of silk ribbon to make the wreath tie and glue it to the top.
- Attach the end of the jute twine to the wreath tie ribbon with the glue varnish.
- Begin to work your way around the wreath with the jute twine, making sure it is tight and evenly covered, all the way to the opposite end of the wreath.
- Cut out the flowers and leaves according to the downloadable templates and assemble them with the pins.
- Put the sisal wool on the bottom of the wreath and stitch the flowers and leaves on top to hold it in place.

A beautiful flower crown!
